

Ademola Ajala

Excellence-driven and action-oriented Computer Engineering student with a proven track record of architecting scalable solutions from a 0-to-1 journey. Passionate about leveraging AI and low-code platforms to accelerate project delivery, multiply impact, and drive innovative problem-solving in tech.

EXPERIENCE

Learn2Earn — AI Native Software Engineer

OCT 2025 - PRESENT

- Demonstrated an excellence-driven approach to architecting scalable web services using **Golang**, adapting swiftly to AI-native development tools to accelerate the deployment of backend infrastructure.
- Executed innovative problem-solving by optimizing **file system** operations and managing configurations within **Linux** environments, ensuring high performance and reliable server-side execution.
- Acted as an impact multiplier during intensive technical sprints, collaborating with peers to debug complex Go applications and streamline technical workflows to deliver high-impact results.

Chevron — Data and Insights Intern

FEB 2024 - JUN 2024

- Led a project team through the implementation of agile methodologies, acting as an impact multiplier by increasing project delivery speed by 40% and reducing cycle times by 25% through daily Scrum meetings and proactive blocker resolution.
- Developed and optimized data management processes using Microsoft Excel, Power BI, Power Apps, and Power Automate, resulting in a 60% reduction in report generation time and improved operational efficiency.
- Conducted comprehensive data reviews to identify discrepancies, implementing corrective actions that elevated data accuracy and integrity by 150%, supporting more reliable decision-making across projects.

SKILLS

Attention to detail, identifying and correcting errors in data entry.

Microsoft Power Platform (Power BI, Power Apps, Power Automate).

Data Analysis (Tableau, SQL).

Go (Golang), Supabase, Google AI Studio, Dataverse, JSON data structures.

AWARDS

MTN Foundation | Science & Technology Scholarship Award
| Sep 2023 - Sep 2026

LEADERSHIP EXPERIENCE

Aspire Institute Inc. | Aspire Leaders Program Cohort 4 (Harvard University) | Aug 2025 - Present

HP Foundation | Effective Leadership | Jun 2025-Present

LANGUAGES

English | Yoruba

EDUCATION

University of Benin — *Computer Engineering (B.Eng)*

OCT 2019 - APR 2025

PROJECTS

IntelliDesk — *AI-Driven Helpdesk System*

- Architected and deployed "IntelliDesk," a Power Platform-based helpdesk orchestrator integrated with AI models via Google AI Studio, demonstrating a visionary approach to enterprise problem-solving.
- Designed Dataverse schemas and utilized GitHub Copilot for technical logic, acting with urgency and operating at the speed of AI to deliver the project for the Agents League Hackathon.

Community Waitlist Backend — *Merch By Nini's Galilee Collection*

- Built a highly scalable interactive email waitlist and "Wall of Faith" submission system using Go (Golang) and Supabase, taking a community-driven application from 0-to-1.

Deloitte (Forage) — *Data Analytics Job Simulation Participant*

- Analyzed complex datasets during a Deloitte forensic technology simulation, identifying critical anomalies that improved investigative accuracy by 30%, and contributed to the development of actionable insights for client security enhancements.
- Designed and deployed a dynamic Tableau data dashboard, increasing reporting efficiency by 40% and enabling real-time visualization of key metrics to support decision-making processes.

FiveGuesses — *Interactive Logic Game*

- Designed and deployed **FiveGuesses**, an interactive higher-or-lower game developed during the Learn2Earn fellowship, demonstrating an action-oriented approach to shipping full-stack applications.
- Architected a robust backend using **Golang**, utilizing JSON data structures for rapid prototyping and testing of the leaderboard before transitioning to a scalable **Supabase** and **SQL** database architecture.
- Integrated a **Google Stitch** frontend and executed a 0-to-1 deployment via **Render**, acting as an impact multiplier by gamifying the learning experience and boosting peer interaction through a dynamic leaderboard.
